

EDITORIAL

Facing difficulties caused by COVID-19 crisis, including financial problems, Presidency of the Serbian Chemical Society decided to reduce the number of printed copies of the Journal of the Serbian Chemical Society, starting from Vol. 85, Issue 3/2020 (March 2020). The number of printed copies for the time being will be minimal and distribution list is going to be accordingly decreased.

Editorial Board apologizes to all who regularly used to obtain printed copies (number of Universities, libraries, chemical societies over the world, members of Editorial Board from abroad and from Serbia, etc.), hoping that they will find and use the Journal of the Serbian Chemical Society at the Home Page of the Journal (www.shd.org.rs/JSCS) and that we will be able to recover and distribute the number of printed copies in the close future.
